

**Procedure:**

**To avoid personal injury:**

- Park the machine on firm and level ground and set the parking brake.
- Lower all attachments and implements to the ground.
- Set all controls in their neutral positions.
- Release all residual pressure of the hydraulic system.
- Stop the engine. Remove the key from the ignition.
- The engine, hydraulic components, and coolants can be hot. Wait until all the components are cooled down sufficiently to avoid burns.
- Clean the work area and machine.
- Disconnect the negative battery cable.
- Hang a **"DO NOT OPERATE"** tag on the operator station.
- Wear work clothes and personal protective equipment.
- Read all instructions and safety instructions in this bulletin and safety labels on your machine.
- Follow local safety regulations and/or laws in your country.
- If you are working with other people, make sure that your signals and communications are fully understandable for additional safety.
- Chock the front and back wheels.

<p style="text-align: center;">Figure 2</p>	<p>2. Clean the floor mat and operator platform to remove any accumulated mud.</p> <p>3. Put marks on the floor mat to make holes by measuring the dimensions from circled holes or by using the template provided on <a href="#">page 7</a>.</p>
<p style="text-align: center;">Figure 3</p>	<p>4. Make 7mm holes in the marked positions.</p> <p><b>Note:</b> You can use 6mm diameter Phillips screwdriver instead of using a drill. If you use a drill, please drill from the sponge side of the floor mat so that you can prevent the drill from slipping and drilling in an incorrect location.</p>
<p style="text-align: center;">Figure 4</p>	<p>5. Draw a line with a black marker, as shown by dotted line in Figure 4.</p> <p>6. Cut the floor mat straight along the black line and discard the top section.</p> <p>7. Reinstall the floor mat and apply 16 new push rivets to the holes to secure the floor mat.</p>
